

Kishor Kumar Sridhar

1133 11th St App 204, West Des Moines, IA – 50265 | 5157087091 | kishorkumarsridhar@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Scientist with 6+ years of industry experience in data science, data analytics, product management, business intelligence, database management and stakeholder engagement. Proven experience in implementing Machine Learning frameworks using Dataiku Data Science Studio, statistical analysis, handling Big Data & presenting compelling dashboards for evidence-based decision-making.

EDUCATION

Master of Business Administration , <i>Trine University</i> , GPA – 3.8/4	Jan '24 – Present
Master of Information Systems, Minor in Statistics (STEM) , <i>Iowa State University</i> , GPA – 3.74/4	Jan '18 – Nov '20
B.E. in Electrical and Electronics , <i>Anna University, India</i> , GPA – 7.58/10	Sept '09 – May '13

TECHNICAL SKILLS

Programming:	Python - Numpy, Pandas, Scikit-learn, Seaborn, nltk, XGBoost; PyTorch, Tensor Flow, R – tidyverse; Git, GenAI
Databases:	MS – SQL Server, PostGres, DBT, NoSQL - MongoDB
BI Tools:	Tableau, Power BI, DOMO, R Shiny, MS – Excel, Alteryx, Looker
Statistics:	A/B testing, ANOVA, Chi-square, Hypothesis testing, Time series forecasting, MLE
Bigdata:	Dataiku DSS, BigQuery, Databricks, AWS – Amazon SageMaker, S3, EC2, Spark MLlib, Amazon Bedrock

PROFESSIONAL EXPERIENCE

Data Scientist *Iowa Select Farms*, Des Moines, IA May '26 - Present

- Built a LightGBM regression model to forecast livestock market weight & days-to-market using farm production, feed consumption
- Applied K-Means clustering & ANOVA to segment farms by efficiency metrics, identifying underperforming operational cohorts
- Developed Power BI dashboards to monitor production, health, & financial KPIs across 800+ pork farms over 7 operational regions

Data Scientist *RDG Planning & Design*, Des Moines, IA Feb '24 - Jun '25

- Analyzed project timeline data to identify patterns and developed predictive models using XGBoost to forecast project durations
- Implemented GenAI using Amazon Bedrock to generate concise summaries of unstructured project notes from architectural designs
- Created PowerBI visualizations to communicate insights and provided actionable recommendations to non-technical stakeholders.

Data Scientist – Product (Remote) *Buildertrend*, Des Moines, IA Dec '21 – Nov '23

- Implemented a Random Forest model with high accuracy to predict vendor categories for enhancing group procurement efficiency
- Facilitated A/B testing experimentation for custom cost codes, driving 25% adoption surge through chi-square & ANOVA analyses
- Conducted Customer Survival Analysis using Kaplan-Meier & log-rank tests to identify key retention factors & targeted strategies
- Analyzed historical data and implemented workflows in Dataiku to target appropriate builders for Builders Risk Insurance service
- Utilized OpenAI's text-embedding-ada-002 for NPS topic modeling, cutting issues by 15% & boosting satisfaction scores by 20%
- Transformed data in BigQuery using DBT workflows, boosting data processing speed & accessibility for informed decision-making
- Developed SQL queries for analytical reports and dashboards in Tableau & presented meaningful insights to business stakeholders

Data Science Fellow (Remote) *Data Science for Public Good Fellowship*, Ames, IA May '20 – Aug '20

- Led two Data Science projects to implement comprehensive data analysis using statistical modeling and hypothesis testing.
- Developed R Shiny dashboards to improve public awareness of Iowa's resources on mental and physical health & education
- Implemented time series forecasting to estimate alcohol sales in Iowa and spatially segmented counties under high-risk alcohol use

Data Scientist Intern *Iowa Department of Transportation*, Ames, IA Jun '18 – May '20

- Implemented predictive models using FB Prophet in Python to estimate customer wait-times for Live display on DOT website
- Applied topic modeling (NLP) using LDA on 10,000 public feedback to identify factors governing highway maintenance in Iowa
- Developed efficient SQL scripts for data cleansing, transformation and data modeling for ad-hoc data analysis and reporting

Data Analyst *Torus*, Chennai, India Aug '16 – Oct '17

- Automated insurance claims processing systems with integrated document management to reduce turn-around time by 30%
- Assisted in planning and implementation of experimental design for A/B testing to improve conversion rate based on various KPIs

Programmer Analyst *Infosys*, Chennai, India Feb '14 – July '16

- Performed extensive data governance activities using Enablon EHS tool for a data migration project to modernize legacy systems
- Improved database performance by reducing query execution time by 50% using advanced SQL queries and stored procedures

LEADERSHIP

Winner of the ISU Athari International Leadership Program Student of the Year 2020

Spring 2020
